(54) IMMERSED BOILING COOLER FOR POWER CONVERTER

(57)Abstract:

PURPOSE: To exhibit the performance of a switching element by lessening the wiring inductance.

CONSTITUTION: The wiring inductance is made small and a converter is downsized by putting a snubber capacitor (shown as a snubber capacitor 6) used as the accessory of a semiconductor element, which constitutes a large capacity of power converter, in cylindrical shape, and accommodating it in a cooling tank 1 together with a semiconductor element (semiconductor stack) 2, and connecting the snubber capacitor 6 with the semiconductor stack 2 in parallel and at the shortest distance by means of a connection bar 10.

LEGAL STATUS

[Date of request for examination]

07.04.1998

[Date of sending the examiner's decision of rejection]

07.03.2000

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection

[Date of extinction of right]
